DEAR
UNIVERSE

GRAPAT

GRAPAT.EU

*SETS 70 / LOOSE PARTS 100 / MANDALAS 110 / HEURISTIC 120

INTRO

Children are like stars in the sky: sometimes too small to see with bare eyes, sometimes hidden behind the clouds, but the ones that bring the light into our sky.

Dear Universe, Let's treat our children the way we treat the stars: admired just the way they are. Let's overcome benchmarks and norms, let's stop thinking in boxes, let's be done with expectations and comparisons. Children are perfect the way they are. Tiny or big, introvert or extrovert, in their own orbit or part of a supercluster. If we stop expecting, we will be surprised. If we stop comparing, we will see with our hearts. If we accept them being themselves, every child will be free. There is no right or wrong.

Dear Universe, Children are miracles that appear when they are ready and that choose how bright they want to shine, choose if they are a blue giant or a red dwarf (or maybe both!). They will surprise you, more than once. They are part of a family, a community, a circle of human beings, like stars are part of constellations. Yet they are themselves, evolving at their own tempo, being different and unexpected. No matter if their heads are full of dreams or if every thought is scientific, no matter the temper or the speed, no matter the origin or the budget, no matter the colour or the language, no matter the gender

or the skills, they are all your children. Stargazers, made of stars. Let them shine. Let them be loved the way they need to be loved. Let them be heard, be accompanied, be loved unconditionally.

Dear Universe, ...

DEAR UNIVERSE

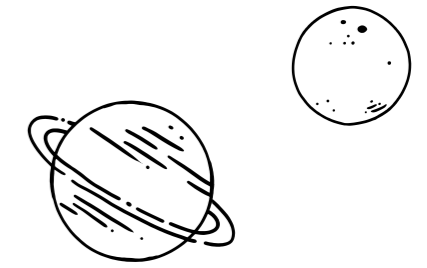

Dear Universe,
What is the correct amount of gas for a perfect sun? How long should the tail of a comet be? Must my planet have an atmosphere? Maybe rings? How many moons?... What is correct? What are the rules? "Don't you know?" says Universe. "Can't you see? There are none. They are all unique and different... Let them be."

We wish kids were stellar objects who spin and sway, seeking balance to find an orbit of their own that integrates them into the system. But they are not. At the very moment a kid is born, this kid becomes a daughter or a son, a sibling, a grandchild, a neighbour, a playmate... From that moment this kid has not only inherited their parents' traits but also their culture, their knowledge... their hopes, their expectations... their rules, their norms. We have a right amount of energy the perfect child should have, an exact

length for a boy's hair, a desirable posture for a gentle girl. Kids cannot spin and sway seeking for their own orbit... kids are educated and taught and pushed into the orbit we draw, and we expect them to rotate at the imposed tempo. But it would be useless for Saturn to try to rotate the same way as Mars, because they're not the same.

Kids try and try to fit our expectations because they need to feel loved and to be included. "I love you for who you are," we say. And that's exactly what they understand... I'm clever, I'm witty, I'm brave and loyal, and a dreamer and a thinker, I'm obedient, clean and quiet... I'm enough. But I'm also naughty and restless, curious and distracted, one of those "all by myself" kids that runs without shelter in the rain... and then I'm not. Kids must be loved for the sake of being and they should be part because they are part of us. And this

way it doesn't matter if Venus rotates in the opposite direction or if Uranus orbits lying face up in the sky. We would like to have kids grow up having their feet on the ground... with their own gravity, because they have their own density, probably a different heat and even some unknown elements that nourish them from the roots to the wings. But we try to walk on their surface like on ours, without changing our boots, although you need bare feet among the dense clouds of Jupiter and perhaps a heavy pair so you don't float away on the Moon. Kids try and try to define themselves and to create their own identity. And they should have the right to outline their own surfaces, drawing and forming their landscapes as their cores need. You could sharpen or round the edges, the same way a stellar wind would do, but you can't give them a different shape without breaking and cratering them like a meteorite would do.

We want kids to be explored instead of colonised. They are not empty spaces waiting to be filled with bright stars. They are already a deep sky full of lights. Sometimes you need to dig a lot of holes to reach an unimaginable ability that boils enthusiastically beneath the

surface of cold rocks. Sometimes you only need to wait patiently, to pay attention and put aside expectations... 'cause you will never be able to see Neptune's diamond rain if you cover up yourself for fear of getting wet.

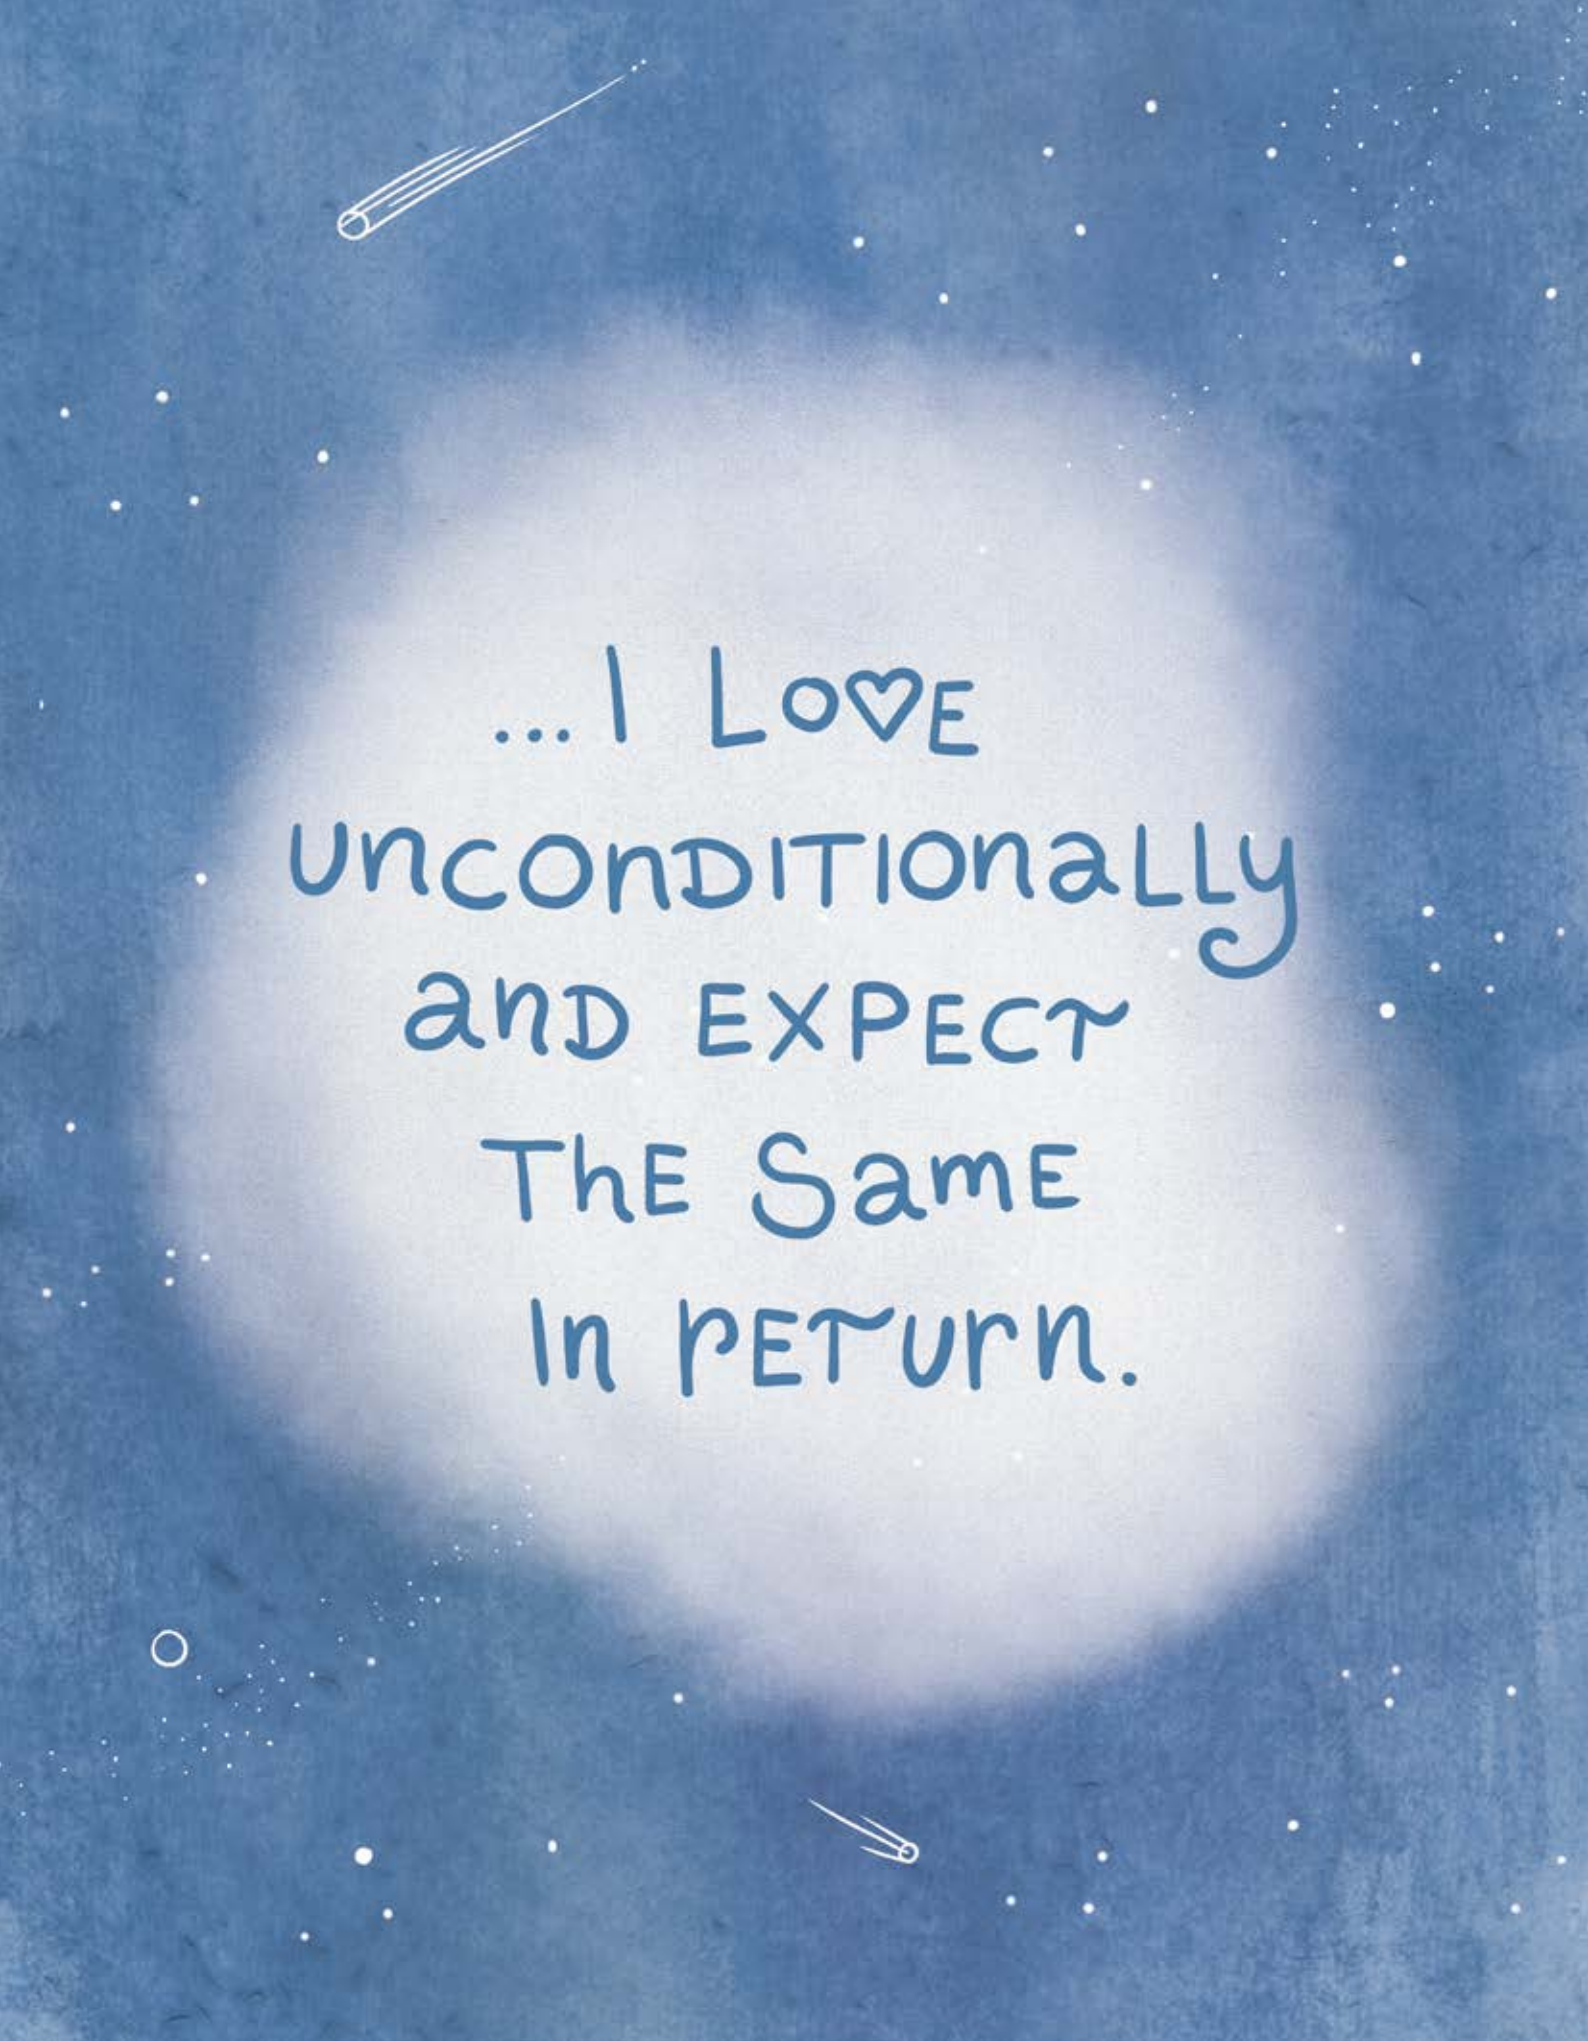

Kids are unique planets that run and run around the Sun. Except for those that are not. You can try to make them round, you can try to smooth their orbit, you can try to erase or cover or mask their tail. Some kids are unique comets that zip around the Sun in their elliptical way. Close they come and far they go beyond the asteroid belt that defines our system. They will go in one end and out another, grazing the stars we cannot reach. They sense the universe in a way we cannot understand or share, but we can help them to pass by the Sun carefully so they don't lose their tails. We would like all kids to be seen as "starflakes": unique, wonderful and rare. Stardust that comes together to create THEM.

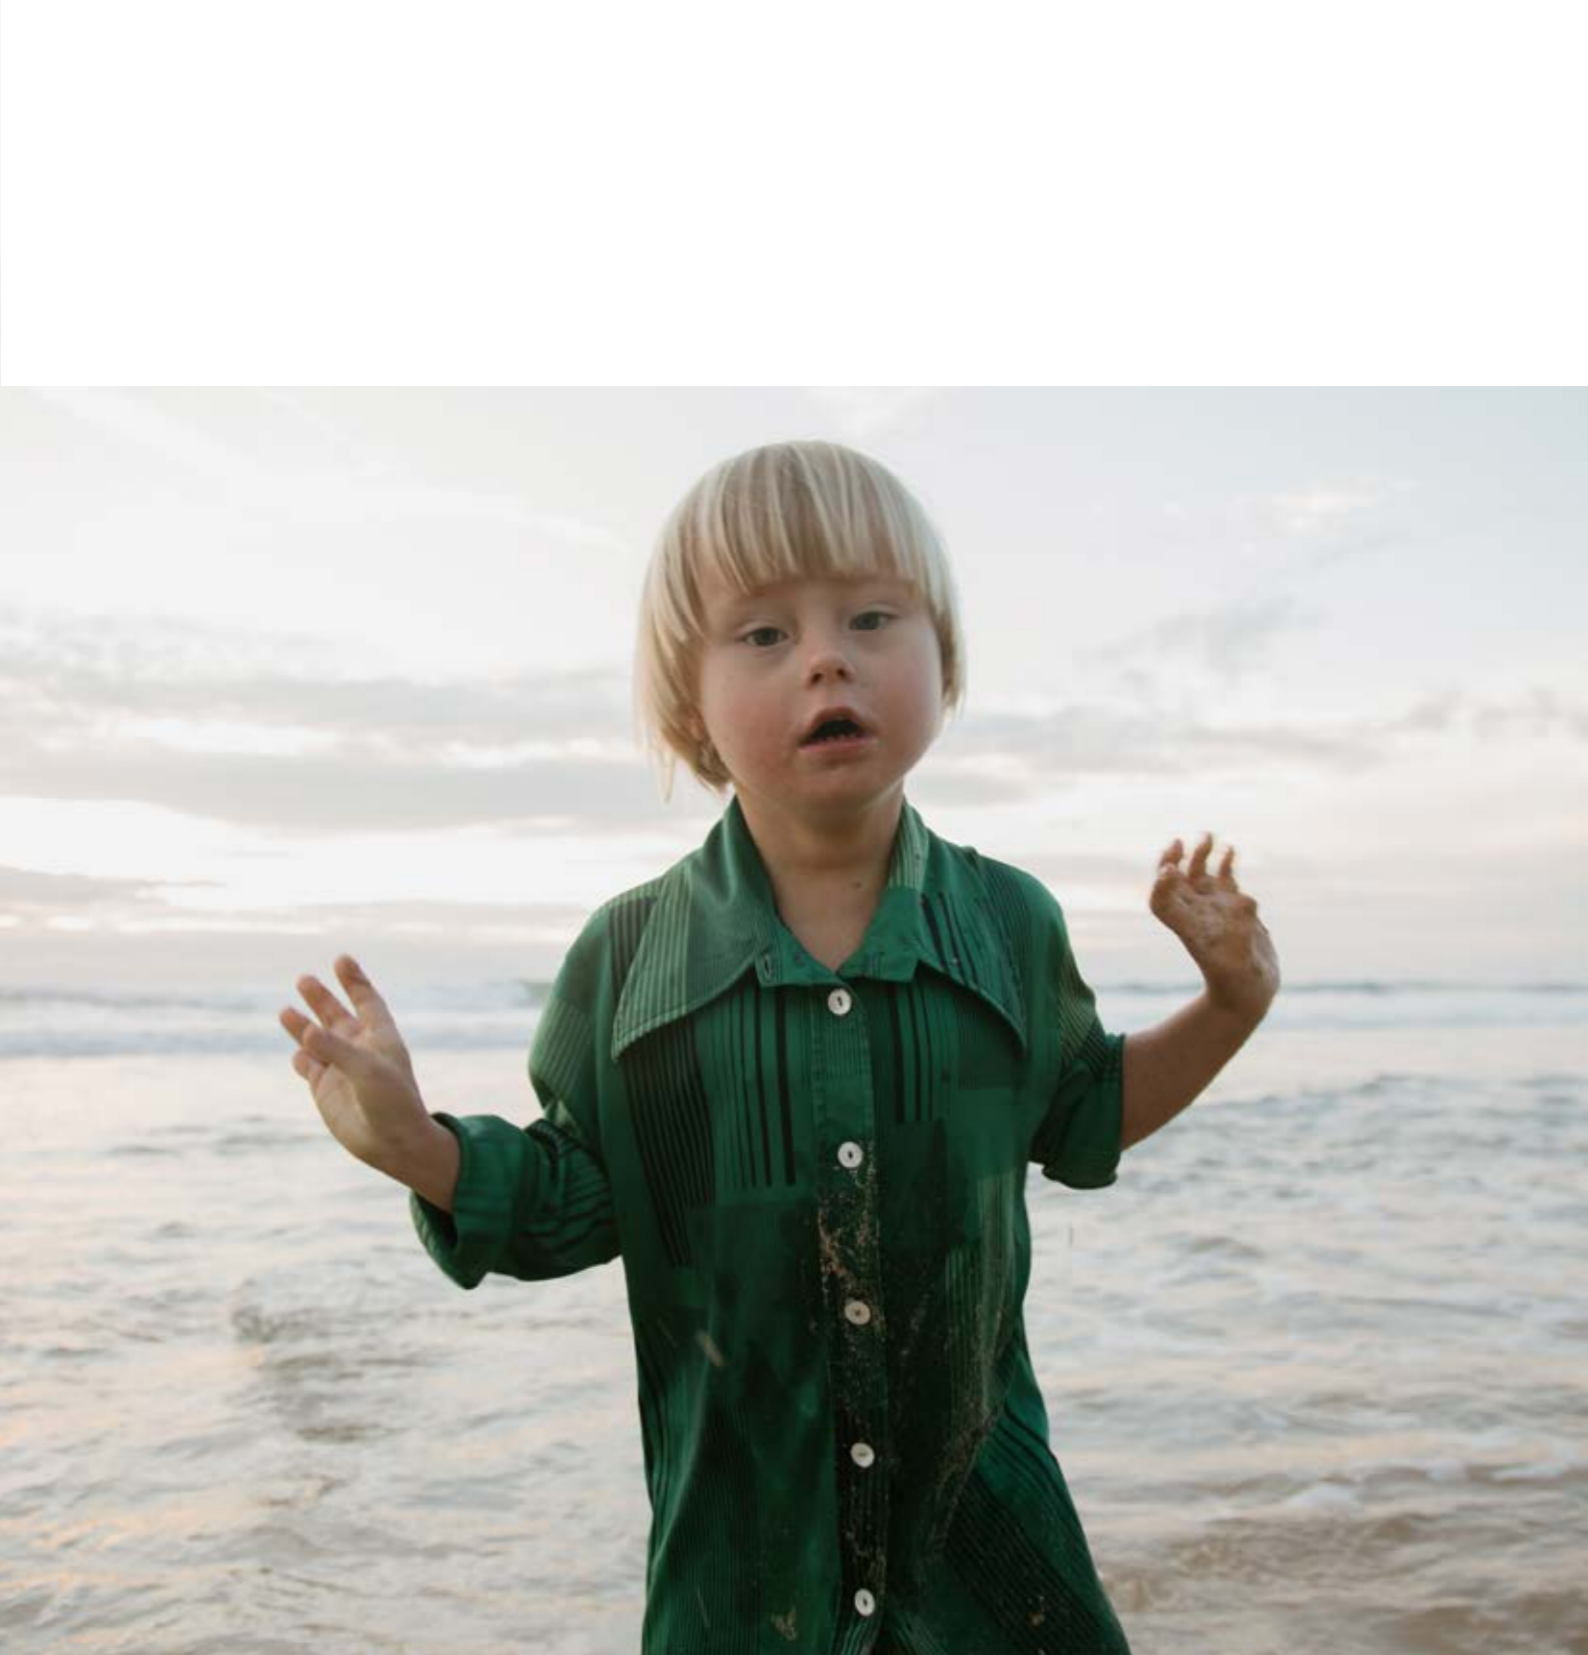

A person with long blonde hair, wearing a tan jacket and a red and white striped shirt, holds up their right hand. The palm is facing forward, and the words "DEAR UNIVERSE" are written in black marker on it. The background is a soft, out-of-focus outdoor setting.

DEAR
UNIVERSE

A deep blue background with a white, glowing nebula in the center. Scattered white stars and two white streaks resembling shooting stars are visible. The text is written in a blue, handwritten font.

... I LOVE
UNCONDITIONALLY
AND EXPECT
THE SAME
IN RETURN.

... my Long
Hair
BELONGS
TO ME
LIKE a Tail
of a COMET.

...WHY DO
THEY WEAR
SPACESUITS
TO WALK THE ROCKY
SURFACE OF THE
MOON BUT MAKE
ME WEAR THIS
ITCHY SWEATER
THAT HURTS LIKE
AN ASTEROID IMPACT
ON MY SKIN?

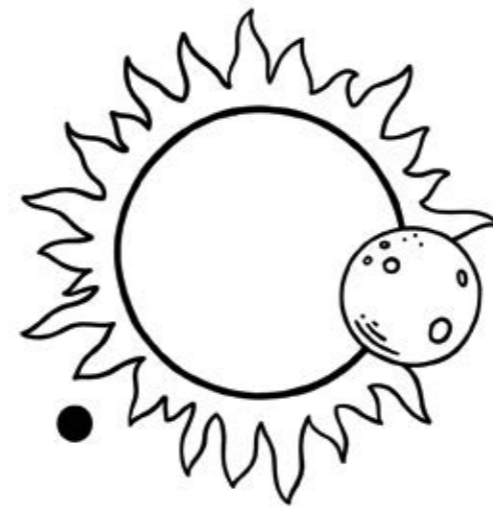

... I DON'T
WANT TO
ANSWER ALL
THEIR QUESTIONS.
WHY CAN'T I JUST
HIDE ON
THE BACKSIDE
OF THE MOON?

WHO
WE are
≈

Grapat started to form as an idea after the birth of our first “starflake” Lola. She was an ingenious and resourceful kid who built her own play universe with everyday objects that became whatever she desired. She didn’t really need any off-the-shelf toys in order to play, she was happy with a few real things, her imagination and, above everything, our presence. We realised there was no need to buy and consume, but to observe, give space and live consciously.

After the birth of our second “starflake” Tomàs, we decided we needed a new orbit, away from the city belt, where we could rotate into a slower way of life we had been longing for. Living in the countryside allowed us to connect to ourselves, and living without the imposed tempo with our two children let us discover a true passion for transmitting this notion of freedom and openness into children’s playtime, which our kids had experienced. Our wish was to offer a new kind of toys, far from the ordinary types, that would do good for kids, parents, planet and the whole ecosystem we live in, that could have a long-lasting impact on our society and the future adults of tomorrow.

That way we started to play and create with wood, and slowly the family home turned into a full operational workshop where we created the pieces with machinery installed in the barn and dyed them by hand with old sheets in the kitchen. This is when Grapat finally materialised, because Grapat –“a handful” in Catalan, the native language of our land– is a humble comet that carries a handful of loose pieces with the utmost care in our hands. No matter how Grapat has grown since then, spreading globally over 62 countries, and no matter how many more and more production space we need, we still create new pieces and prototypes out of clay or beeswax, we

keep staining our pieces by hand in-house and we still communicate with the universe using our authentic voice. Grapat found its orbit spinning and swaying around our way of live and our vision for the future we believe, and is, and always will be, a family project. We know well what boundaries we need to respect, as overcoming them in order to grow quicker would simply not be who we are. We believe in an organic growth that happens inevitably but consciously, at a sustainable rhythm.

Nature is both our clock and our muse. We live in rhythm with her, respecting her, and she is our design inspiration for every new

piece we create. Our true, main inspiration though, is children. With Grapat, we want to make sure that every child has a free and respectful upbringing, filled with open-ended playtimes that should invite and incite their own genuine flair for creation without instructions nor limits. Our duty as parents is protected this sacred moment, put aside expectations and let them outline their own universe to grow, learn and find themselves. Our motto is "be free, play open!" Every time a box leaves the factory, we think about how the children will share the best playtimes with our pieces, with the intention that they will last forever. Our aim is timeless: if our material gets passed on from one generation to another, then it means our purpose will have been fulfilled, and this is our hope and joy.

We work at the service of childhood, offering open play material, loose parts and kits that favour open-ended play and lets the child connect with their inner desires, their inner selves, to find their own path. We don't want to simply offer material, we feel like we have a social responsibility towards society, and our true wish is to spread knowledge and practical ways of integrating valuable pedagogy that resonates with this philosophy of freedom into our everyday lives.

We are in a lifelong love affair with Nature, we accept that we lack control over her so we simply observe and respect her. Our creations are an offering to her, not an attempt to modify her laws. Our goal is simplicity itself - when working on a product, we draw inspiration from its true natural form and then try to reduce it to the essential, detaching from the unnecessary, resorting to as little material as possible. This is because the less information a toy has, the more a child can build upon it, and transform the piece from playtime to playtime with their pure ingeniousness.

Wood is our element. It is warm and alive, it is soft and robust at the same time. Its irregular shapes and incomplete patterns make it unique and truly beautiful to our eyes. Its texture holds a wealth of information and hidden stories waiting to be discovered by the senses of every child. Over time, the wood will acquire subtle dents and scars, and that means that it has accomplished its very aim, providing children with hours and hours of free and open-ended play, and we deeply cherish

HOW
WE
WORK

that. The "imperfectness" of the wood makes each piece unique - just like us humans!

Our toys are produced according to traditional manufacturing processes and with locally-sourced sustainable materials.

Colour has the power to connect us to emotions and to everything that happens inside of us, this is why our colours come directly from nature and reconnect us to her. Each piece is stained by hand; working with dyes instead of acrylic paint allows us to keep in contact with the wood and its veins in a kind and noble way. The dye sinks deep into the surface of the wood without covering its beauty and giving an everlasting effect.

Depending on temperature, humidity and wind, the dye gets absorbed into the surface of the wood in different ways, but we appreciate this as it is another seal of authenticity and truthfulness.

Due to the excess of pigment, some pieces might lose colour when getting in touch

with saliva, but this is absolutely fine as all colours are 100% safe and non-toxic. The elements are finished using waxes and oils of vegetable origin. The oils can have a strong aroma at first, but they soften with time. Enjoy it while it lasts!

As part of our engagement to sustainability, our packaging has been 100% free of plastic since 2019. We use cardboard boxes for all our products to contribute to the reduction of waste on the planet. We actually encourage the reuse of the packaging itself, as it can become an integral part of the play. We are also continually making changes and improvements towards this direction in all of our production and shipping processes, sharing every step in total transparency through our social media platforms.

Social responsibility is part of our way of life, so we collaborate with foundations that take care of people with physical or mental disabilities who help us to develop packaging tasks. We are also active in giving back to society by supporting different charities and humanitarian projects with a focus on childhood and families..

When forming the company, we didn't want to use a traditional business model. We don't believe in pyramidal structures so we shaped it according to a sociocratic philosophy. We practice self-management and shared authority. Family conciliation with work is a topic that we take special care of, so the working schedule of each employee is adapted to everyone's personal needs. Happy work is better work! ••

CERTIFICATIONS

The dyes are water based and non toxic. The colours and their appearance might vary slightly, like nature itself.

The wood we use comes from sustainable forests and holds the certification PEFC 14-35-00485.

The finishes are made with wax and oils of vegetable origin.

Some of our products include cotton bags. All the fabrics have a GOTS Certificate (Global Organic Textile Standard) as they are produced ecologically and with social responsibility.

All of our collaborators and suppliers are of proximity, located in Europe. In this way we can know about the way of working and can ensure fair working conditions.

The workshop is structured according to the TEAL philosophy. It's based on self-management, fulfilment and personal growth.

All our packaging is 100% plastic free. We also produce the boxes with a heavy-weight cardboard that ensures the life of the box for approximately 5 years. We consider our boxes as part of the toy.

Most of our products are in one piece. In spite of this, some elements need the use of glue for their assembly. The glue used is 100% formaldehyde free.

All our products are manufactured and tested in accordance with the safety requirements of the European (EN71 1-2-3), American (ASTM) Toy Safety Standards, and ISO8124.

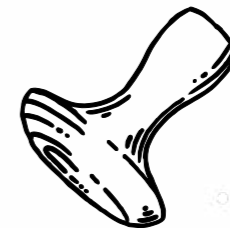

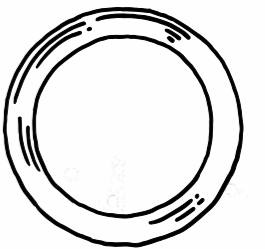

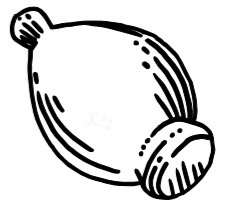

SETS

70 — 99

Our proposal for the playsets favours creative and divergent thinking. Free play allows our children to connect with their deepest desire and develop the activity they need.

Unstructured and open-ended play material doesn't have a correct or incorrect way to be used, so we work without instructions.

Our materials are open to allow children to navigate themselves through all their learning phases. The pieces can be transformed into symbolic material for the creation of stories and the construction of small worlds, but can also lend themselves for mathematical, language or sensory play activities.

NINS, MATES & COINS

15-101 +36 MTHS

6 Nins / 65 mm height / 6 mates / 45 mm height / 6 coins / 48 mm ø / included GOTS certified cotton bag

NINS, RINGS & COINS / NATURAL WOOD

15-102 C +36 MTHS

6 Nins / 65 mm height / 36 rings / 48 mm ø / 18 coins / 48 mm ø / included GOTS certified cotton bag

3 wizards / 70 mm height / 3 mates / 45 mm height / 3 Nins / 65 mm height / 9 coins / 48 mm ø / 9 rings / 48 mm ø / colours featured represent the natural occurring tones of the season

NINS CARLA

16-139

+36 MTHS

12 Nins / 65 mm height / 72 ring / 48 mm ø / 36 coins / 48 mm ø w / included GOTS certified cotton bag

AGUAMARINA AUTUMN

16-163

+36 MTHS

3 wizards / 70 mm height / 3 mates / 45 mm height / 3 Nins / 65 mm height / 9 coins / 48 mm ø / 9 rings / 48 mm ø / colours featured represent the natural occurring tones of the season

AGUAMARINA WINTER

16-164

+36 MTHS

3 wizards / 70 mm height / 3 mates / 45 mm height / 3 Nins / 65 mm height / 9 coins / 48 mm ø / 9 rings / 48 mm ø / colours featured represent the natural occurring tones of the season

AGUAMARINA SPRING

16-165

+36 MTHS

3 wizards / 70 mm height / 3 mates / 45 mm height / 3 Nins / 65 mm height / 9 coins / 48 mm ø / 9 rings / 48 mm ø / colours featured represent the natural occurring tones of the season

PERPETUAL CALENDAR

17-167

+36 MTHS

platform in 4 parts / 220 mm ø / 2 cubes / 35 mm / 1 bowl / 60 mm ø / 12 Nins / 65 mm height / each Nin's colour represents its corresponding month, according to the Waldorf pedagogy

available in 20 languages

7 MOONS, WEEKLY CALENDAR

17-168

+36 MTHS

plate / 180 mm ø / 7 acorn-Nins / 65 mm height / 7 vessels / 61 mm height / each Nin's colour represents its corresponding day of the week, according to the Waldorf pedagogy

RAINBOW DISHES

17-170

+36 MTHS

6 rainbow dishes / 180 mm ø

PLATFORMS, DICE & BOWL, PERPETUAL CALENDAR

17-171

+36 MTHS

platform in 4 parts / 220 mm ø / 2 cubes / 35 mm / 1 bowl / 60 mm ø /

available in 20 languages

STICKS

18-178 | +36 MTHS

18 magical Sticks / 70 mm height /
6 basic colours, each in 3 different shades

BABY NINS

18-180 | +36 MTHS

6 Baby Nins / 38 mm height / coconut
shell included (may vary in shape and size)

DARK ADULT NINS

18-181 | +36 MTHS

adult Nins / dark wood / 98 mm height

LIGHT ADULT NINS

18-181 B | +36 MTHS

adult Nins / light wood / 98 mm height

WIZARDS

18-182 | +36 MTHS

12 wizards / 70 mm height / included GOTS
certified cotton bag

12 MATES

18-183 | +36 MTHS

12 mates / 45 mm height

NINS TOMTEN

18-196 | **+36 MTHS**

playset features: 6 Nins Tomten / 70 mm height / 18 little coins / 22 mm ø / other pieces / 25 mm to 40 mm height / included GOTS certified cotton bag

COINS TO COUNT

19-208 | **+36 MTHS**

60 coins (6 times x 10 numbers) / 48 mm ø / included GOTS certified cotton bag

ROUND

18-197 | **+36 MTHS**

6 balls / 45 mm ø / 12 semispheres / 50 mm ø / 12 discs / 60 mm ø

INSECTS

19-209 | **+36 MTHS**

6 ladybugs / 40 mm ø / 6 slimes / 52 mm length / 6 ants / 44 mm length / included GOTS certified cotton bag

BROTS

19-207 | **+36 MTHS**

18 friendly Brots / 70 mm height / 6 basic colours, each in 3 different shades

SEASONS & ELEMENTS PLATFORM

19-210 | **+36 MTHS**

Hand-stamped round wooden platform with the 4 seasons and the 4 elements / 380 mm ø / can be used as a complement for the Perpetual Calendar / anticlockwise direction

TINKER TRAY

19-211

+36 MTHS

tinker tray for storing and collecting / natural wood / 440 mm x 295 mm x 45 mm

CONSTRUCTION BASE PLATFORM

20-214

+36 MTHS

wooden platform for free construction play / 380 mm ø

LOLA

20-212

+36 MTHS

12 big Lola 65 mm height / 12 mid Lola / 45 mm height / 12 small Lola 20 mm height / 12 tubes 70 mm height / 12 beakers 70 mm height / 12 solid tubes 70 mm height

NEST BOWLS

20-215

+36 MTHS

24 rainbow nest bowls / 72 mm ø x 38 mm height / 58 mm ø x 38 mm height / 44 mm ø x 38 mm height / 30 mm ø x 38 mm height / 6 gradient colours

RAINBOW TOMTENS

20-213

+36 MTHS

6 Nins Tomten / 70 mm height

NEST RINGS

20-216

+36 MTHS

24 nest rings / 4 different sizes / 100 mm ø / 74 mm ø / 48 mm ø / 23 mm ø / 6 gradient colours

LITTLE THINGS PURPLE

21-224

+36 MTHS

purple wish box with little figure inside/
42 mm ø x 54 mm height

LITTLE THINGS YELLOW

21-227

+36 MTHS

yellow wish box with little figure inside/
42 mm ø x 54 mm height

LITTLE THINGS BLUE

21-225

+36 MTHS

blue wish box with little figure inside/
42 mm ø x 54 mm height

LITTLE THINGS ORANGE

21-228

+36 MTHS

orange wish box with little figure inside/
42 mm ø x 54 mm height

LITTLE THINGS GREEN

21-226

+36 MTHS

green wish box with little figure inside/
42 mm ø x 54 mm height

LITTLE THINGS RED

21-229

+36 MTHS

red wish box with little figure inside/
42 mm ø x 54 mm height

TOGETHER

21-230 +36 MTHS

12 Nins in 3 skin tones / 3 narrow Nins / 65 mm height / 3 wide Nins / 65 mm height / 3 striped Nins / 65 mm height / 3 Baby Nins / 38 mm height / GOTS certified cotton bag

BABY STICKS

21-231 +36 MTHS

6 Baby Sticks inside cardboard tubes / 42 mm height / 18 mm ø

DARK BABY NINS

22-180 B +36 MTHS

6 Baby Nins dark / 38 mm height / coconut shell included (may vary in shape and size)

WILD

22-232 +36 MTHS

12 creatures from the fauna realm, each with their own superpower and story written on their card / 30 to 70mm length / included wooden sorting box

WONDERS

22-233 +36 MTHS

12 elements from the flora realm, to connect the child with the cyclical changes in nature / 30 to 120mm length / can be combined with the perpetual calendar

OOH-LALA!

22-234 +36 MTHS

delightful family of 3 / 37 to 65mm height / 28 to 39,5mm ø

WOW!

22-235

+36 MTHS

funny family of 3 / 37 to 65mm height / 28 to 39,5mm ø

HOORAY!

22-236

+36 MTHS

kind family of 3 / 37 to 65mm height / 28 to 39,5mm ø

YAY!

22-237

+36 MTHS

happy family of 3 / 37 to 65mm height / 28 to 39,5mm ø

PETALS PLATFORM

22-238

+36 MTHS

24 wooden petal-shaped platforms / 289 x 90x 9mm / can be combined with the mandala collection

STORAGE BOX

22-239

+36 MTHS

wooden box for storing and collecting / 160x45x160mm

LO

22-244

+36 MTHS

6x Big Lola / 6x Mid Lola / 6x Small Lola / 6x Tubes / 6x Solid Tubes / 6x Half Tubes

One of the two little sisters of our renowned Lola set, containing 36 pieces in our 6 basic colours.

LA

22-244 B +36 MTHS

6x Big Lola / 6x Mid Lola / 6x Small Lola / 6x Tubes / 6x Solid Tubes / 6x Half Tubes

The other little sister of our renowned Lola set, containing 36 pieces in our 6 non-basic colours.

FANCY NINS

23-245 +36 MTHS

12 Nins with interchangeable hats and bodies / 65mm height / different final heights including the hats

HAPPY PLACE

23-246 +36 MTHS

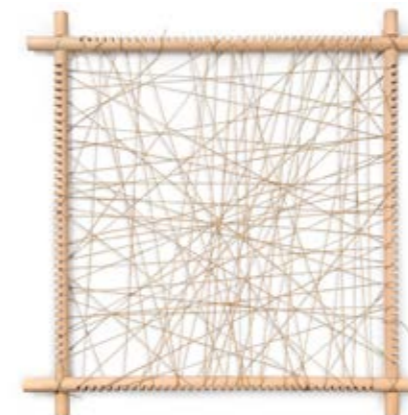

40 pieces with different shapes and colours to create your own happy place / size from 20mm to 150mm

FRAME

23-247 +36 MTHS

4 sticks to create frames and seasonal set ups / 495mm height / includes a ball of hemp thread

PERMANENCE BOX

23-248 +36 MTHS

Box to favour the knowledge of the principle of permanence / 162x125x84 mm

YUMMY

23-250 +36 MTHS

1 plate 125 mm Ø / 1 big spoon / 1 small spoon / 24 pieces of food

HAPPY EGGS

23-253

+36 MTHS

12 eggs / 45 mm height in / 12 colours

ADVENT CALENDAR 2024

24-243

+36 MTHS

Will be available in summer 2024.

LIMITED EDITION

DEAR UNIVERSE

24-255

+36 MTHS

Explore the outer space with our planets. Besides being objects for open-ended play, the planets also work as a perfect addition to our weekly calendar. As the days of the week were originally named after planets, you can match them all.

The Dear Universe contains more than 40 wooden pieces / sizes from 12 mmø to 45 mmø. This set can be combined with Weekly Calendar 17-168.

NEW

MOONLIGHT TALE

24-256

+36 MTHS

Once upon a time there was a moonlight kingdom... continue the story of this enchanted set and meet some characters that will sparkle your imagination.

Our moonlight tale is starring 22 pieces in different shapes, sizes and beautiful diluted colours

NEW

MIS AND MATCH

24-257

+36 MTHS

Mis and Match is a collection of colourful cubes in a wooden sorting box. The cubes are multi-functional. No matter if being used for free play or to create mosaics, by using them the kids will experience mathematical and geometric concepts through exploring them with their hands.

400+ small wooden cubes / 36 gradient colours of the rainbow/ includes a hand-painted wooden sorting box

NEW

YOUR DAY

24-258

+36 MTHS

Today is your day! This set includes some beautiful pieces to celebrate: a candle, a star, a crown, some party decoration... This set can be combined with our Perpetual Calendar and helps to understand the abstract concept of time.

31 pieces / wood and felt / different sizes, shapes and colours

This set can be combined with Perpetual Calendar 17-167.

NEW

TOOLS

24-259

+36 MTHS

This set contains 6 different tools, each in a unique size, shape and colour. They are a great addition to all kind of sensory play. They can be combined with our "Pots".

6 tools in rainbow colours / different shapes and sizes

NEW

POTS

24-260

+36 MTHS

This set contains 6 pots in different colours, sizes, volumes and shapes. They're perfect for nurturing sensory development. It can be combined with our "Tools".

6 pots in rainbow colours / different sizes

NEW

LUCKY LUCKY III

24-261

+36 MTHS

15 surprise sets full of joy, offered in separate blind-boxes with the aim to be collected, shared, swapped, traded and anything in between. Unlock their mysteries of our third edition.

13 | Once a dot

14 | Up, down and around

15 | Enchanted mushroom

LOOSE PARTS

100 — 119

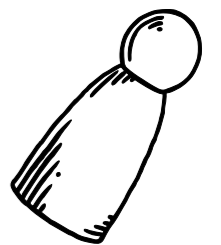

Our collection of loose parts is intended as a complement to the sets, although the pieces can also be used separately.

Based on the theory of loose parts by Simon Nicholson in 1971, we propose rich play objects, unstructured and open-ended. They allow the child to combine, align, carry, transport, stack or classify in different ways.

The loose parts allow children to redesign and reformulate. They can also be combined with objects found outside to favour contact with our closest environment.

Loose parts can be used for multiple purposes. There is no single specific way to use them and there is no right or wrong way to play with them.

All loose parts are presented in the range of colours of the rainbow, their tones allow us to connect with nature.

18 RINGS

15-115

+36 MTHS

3 Nins / 65 mm height

MANDALAS

110 — 119

The Mandala collection invites children to create mandalas, individually or collectively. They can also be used to create pictures and representations.

We chose the amount of 36 in order to make round creations. Depending on the needs of every kid, they can enrich symbolic play, they can be used as food for cooking or elements to transport.

When the kids grow and get to the phase of concrete learning, Mandala pieces can be of help with counting, lining up, or creating letters ... just let them surprise you!

NEW

HEURISTIC

120 — 127

The Heuristic game is composed of different types of elements with different shapes and offered in their natural wooden texture, so that children can explore and manipulate autonomously and freely.

They can combine, relate, match, cover, fill, empty, rotate, stack or anything else they can imagine.

#1

To best care for the parts, store them in a dry place

caring
TIPS.

#2

To clean them, wipe with a damp cloth and dry immediately.

#3

The pieces should not be submerged in water nor should they be disinfected.
