Additions for New and Old Favourites

Wonderfully tactile and versatile construction pieces. Watch as the element of movement is added to the play scene - see the rollers roll across the floor in all directions.

Combine with our other building pieces, both small and large, to create color matched Castles, Palaces and entire Cities.

Motor skills are encouraged with the Stacking Game and there is lots to discover with the various color sorting options.

Increase construction options with the help of the wooden coins, by combining with the large and small stacking rollers.

**Stacking Game
 Small Rainbow Rollers**
 H 30/60/90 mm, Ø 30
 12 pieces in sorting board
 Recommended Age: 3+

What's the weather like today?

We want to make an abstract topic comprehensible to children in a hands-on way.

The beautiful shape and feel of the play pieces stimulates the child's imagination and stories about the weather can be experienced and emulated: Let's comfort Little Rabbit who has hidden under his bed out of fear of the thunderstorm! Through play fears can be processed and alleviated.

In form and shape, The Weather Building Set is perfectly matched to our Large Twelve-Piece Rainbows.

All young builders, of both small and large worlds, can use these pieces to bring sunshine to their day, to conjure up lightning and thunder, or let snow and rain fall from the sky. A good storm drives all the clouds from the sky so that the sun can dry and warm everything once again.

The Weather Cardboard Book

17x17 cm
Recommended Age: 1+
26 pages, FCI certified 400g-Paper made with ecological colors and produced according to EU toy standard EN-71. Biting and saliva proof with rounded corners.

Alphabet in Balance

We want to make the abstract world of letters tangible. Grimm's wooden letters are unique in their balanced shape. In contrast to other decorative letters, it is possible to stand these letters up. They are also perfect for decorating the seasonal and birthday table.

See Main Catalog 2019/20, Page 75, Art.No. 60000 - 60250)

A little dream comes true

We are very happy with our first ever GRIMM'S book, created in collaboration with the German illustrator Sarah Settgast.

The 26-page board book uses 24 lovingly designed illustrations to tell stories about the weather and everything associated with it. The 24 chosen themes are spelled out from our GRIMM'S wooden letters and frame each illustration in both German and English. Sarah Settgast illustrated almost 100 of our wooden toys and then included them into her illustrations using collage technique.

There is a lot to discover in this book, because anyone who loves GRIMM'S toys will happily search for the many toys made in our workshops that are hidden in the illustrations.

Even little ones will enjoy looking and telling stories together. The capital letters are wonderful for early learning and also for the introduction to foreign language learning in primary school or at home. And of course the board book is a delightful decoration for every season table. An experience for the whole family and for all the senses!

Sarah Settgast is a glasses designer, freelance illustrator, author and publisher. Born in the small Brandenburg town of Kyritz an der Knatter, she now lives in Berlin with her 7 and 8 year old children. Her style is influenced by the Waldorf tradition. So far 3 children's books have been published in German by the Deutsche Pappbuch Gesellschaft.

The bilingual Weather book is produced in the last board book factory in Germany at Sachsdruck Plauen on FCI-certified 400g paper with ecological toy colours and produced in accordance with the EU toy standard EN-71. It is bite and saliva proof and has rounded corners.

 (10163).

09090
Building Set Wooden Train
 17 pieces + string
 Recommended Age: 4+
 To connect the wagons, the string is placed in a short loop over the dowels and fixed with the base plates.

On a big trip

Our small wooden train runs on all standard wooden tracks as well as on smooth flooring.

With this train, our rainbow friends can go on a long journey or transport ever-changing freight from here to there.

We have made our little wooden train as a construction game, so it can sometimes race over the rails as a modern high speed train or be a more nostalgic-looking locomotive.

We are already looking forward to the many travel stories that our construction toy train will soon tell!

10674
Pastel Semi Circles
 L=37 cm, H= 0,8cm
 11 pieces
 Recommended Age: 1+

10690
Small Natural Rainbow
 L = 10,5 cm
 6 pieces
 Recommended Age: 3+
 The warm alder wood gives the little rainbow its lively and unique structure.

Majestic

A wonderful building set in a wooden frame that combines organic shapes in oiled natural wood and colourful geometric shapes.

The Majestic Building Set is more than a tribute to an endangered animal.

With this set, we wish to bring a little HAKUNA MATATA into your life. The saying originates from the African Swahili language and means „There is no difficulty“ or „Do not worry“

„Strength - serenity - loyalty symbolise the king of the animals, who is dependent on the life in the pack“

- Building Set Rainbow Lion**
- Frame L=44,5 cm,
- 27 pieces, H=30/40mm
- Recommended Age: 3+

How the rainbow lion came to be

As you all know, we love nature and are very lucky to live in one of the most beautiful hiking regions in Germany.

Here in the Swabian Alps, numerous stories and legends exist around a symbolic lion, and the lion symbol can be found on many hiking paths in the region.

With Simba, our four-year-old male dog, we like to be on these beautiful hiking trails and listen to each ones individual story.

The special path markings in the form of a lion's head accompany you uphill and down dale, through forests and across meadows, and so this simple signpost inspired this magnificent construction kit in the form of a rainbow lion
